

How-To:

Restoring your Windows Address Book to Outlook Express

<http://www.vermontcomputing.com>

1. Make sure the .wab file is not read only (if it's on a cd, copy it to the hard drive and take off the read only flag in properties).
2. Open Outlook Express. Go to File/ Import/ Address Book.
3. Navigate to the location of the address book. Highlight it and click Open. (By default it is kept in either Documents and Settings/User/Application Data/Microsoft/Address Book (2000/XP) OR Windows/Application Data/Microsoft/Address Book (9x).

4. The address book will now import. It may take a long time depending on how many entries you have.
